Nic Ung

BSc. Computer Science Major

Technical Skills

Programming Languages: Java, C/C++, Python, Dart, OpenGL, JavaScript, TypeScript, HTML, CSS

Strategies: Object Oriented Programming, Test Driven Design, CI/CD, Data Structures, Algorithms, REST APIs, Relational Database, AGILE

Tools/Environment: GitHub, GitHub Actions, Bash, PowerShell, SQL, Docker, QEMU, VSCode, IntelliJ, Arduino IDE, Unraid, TrueNAS Scale, Wireguard, TailScale, OpnSense, CMake, Flutter, Next.js, PlatformIO, Pillow, Jenkins, BitBucket, Jira, Confluence, Docker Hub, SMB, Linux, Bash, Shell, Clonezilla, Azure Devops, Azure Key Vault, Azure Pipelines

Testing: GDB, JUnit, Valgrind, TM4J, Azure Test Suite

Web: Cloudflare DNS, Azure, AWS, Vercel, Azure DevOps

Technical Work Experience

Teledyne FLIR IIS Machine Vision **09/2025 – 09/2026**

Co-op DevOps Engineer *Vancouver, BC*

- Improved nightly build success rate from under 30% to over 90%, significantly reducing developer friction and wasted CI cycles.
- Halved AWS infrastructure costs by auditing cloud resource usage and decommissioning a service unused for 2+ years, with zero operational impact
- Facilitated a full migration from a self-hosted Atlassian suite to GitHub (Actions, Repos, Issues), Azure Pipelines, Azure Test Plans, and Azure Key Vault, improving cross-site collaboration, operational visibility, and enabling AI tooling integration
- Maintained local build and test infrastructure across multiple operating systems and architectures, ensuring reliable development environments for the team
- Owned incident response for critical infrastructure failures including Jenkins outages and AD failures, coordinating cross-functional recovery, and liaising between developers and IT
- Proactively documented issues and solutions. Providing clear references for solutions and post-mortem analysis to prevent and recover from similar issues in the future with a clear outline of the changes to prevent a reoccurrence.
- Proactively created a Jenkins backup job following a rollback incident, eliminating a single point of failure before it could recur
- Regularly identified system reliability gaps and proposed actionable fixes, pushing planning meetings that create measurable infrastructure improvements

Bastion Payment Systems Corporation **06/2023 – 09/2023**

FinTech Developer Intern *Philippines, Makati*

- Worked closely with senior management to develop and implement a business continuity plan in the event of a catastrophic event, improving availability up to 6 9s
- Coordinated with IT and operations teams to test, plan and begin deployment of mitigation systems with complete functionality in place under 2 months of initial rollout

Projects

Google Calendar Discord Bot **03/2025**

- Engineered a Discord bot to synchronize Google Calendar events with server events, enhancing community coordination and increasing turnout.
- Integrated secure communication and API authentication with a personal Google Cloud Project
- Deployed via Docker on a self-hosted server, demonstration proficiency with containerization

ESP23S3 Oil Pressure Gauge **01/2025 – 02/2025**

- Designed a complete hardware solution including chassis, mounts, circuitry based on an ESP32S3 Development board.
- Developed a modular and multifunctional firmware that enables easy adaptation for multiple sensor interfaces
- Authored comprehensive documentation and outlined my development process to help show challenges I had faced and corresponding solutions. This allows for further development and transparency.

Just Parry **09/2024 – 12/2024**

- Led the prototyping of a responsive, precision-based fighting game amongst a team of 6
- Developed proficiency utilizing GLM for matrix operations, SDL for audio and input handling, and CMake for cross platform compatibility
- Built a custom game engine in C++ to have greater control over input processing increasing input consistency by 33%
- Applied Agile methodologies for efficient development and project management amongst all the developers
- Utilized leadership and communication abilities to hold weekly scrum meetings, ensuring team alignment and progression

Extracurricular Activity

UBC Esports Association **08/2020 – 05/2025**

Developer *Vancouver, BC*

- Helped develop and deploy a custom lounge management web app for our PC Café. Increasing our front desk efficiency by over 50%
- Actively engaged with code reviews and bi-weekly pair programming sessions that helped improve team understanding of the code base by 20%
- Provided contributions for both the frontend and backend components, upholding our style guidelines, scalable and maintainable code

President

- Led a university club of over 100+ executives, overseeing operations, delegations, and strategic planning
- Liaised between club executives and university personnel to organize room bookings, event logistics, and administrative duties.
- Directed end-to-end planning and execution of events that hosted over 300 attendees, coordinating between internal teams to ensure success and direction.
- Applied conflict resolution and de-escalation techniques to maintain team cohesion and resolve interpersonal issues.

Work Experience

Code Ninjas **06/2024 – Present**

IT Consultant/Code Sensei *Richmond, BC*

- Designed and deployed a scalable, multi-functional server system, reducing project transfer interruptions and increasing effective instruction time by 30%
- Delivered hands-on instruction in microcontrollers, AI Training, Lua programming while adapting content to students' learning levels.
- Supported students grasp of core computer science concepts with interactive lessons

Board's Boards **05/2020 – 03/2022**

Founder *Richmond, BC*

- Built and ran a niche small business creating custom controller modifications using 3d printing, microcontrollers, and custom circuit boards
- Developed and prototyped hardware in CAD software, overseeing the complete production and delivery lifecycle
- Independently managed business finances, marketing, and client relations.

Education

University of British Columbia **09/2020 – Present**

B.Sc Major in Computer Science with Co-op *Vancouver, BC*

Certifications

Microsoft Certified: Azure Fundamentals **01/2024**

AWS Cloud Practitioner Essentials **02/2024**

Soft Skills & Interests

Software: Microsoft Office Suite, Google Suite, AutoCAD, KiCad, 3DSMax, Fusion360, Google Sketchup, Davinci Resolve, Notion, Sage50, PrusaSlicer

Languages: Fluent English, Basic Mandarin, Basic French, Basic Tagalog

Work Style: Good Under Pressure, Time Sensitive Problem Solving, Troubleshooting, Systematic Approach, Collaborative
